

FIVE PLUS FIVE YEAR VALIDITY POLICY

1. Instituted March 2019. Published May 1, 2019. The "Five Plus Five-Year Validity (Migration to Local Production)" policy aims to promote and support the growth of the pharmaceutical industry by encouraging local manufacture.
2. This can ensure dependable and prompt access to necessary medications by shortening the supply chain and preventing the issues of shortages and stock-outs of essential medications.
3. The **5+5 validity policy** currently has twenty-nine (29) products which can only be registered as locally manufactured Pharmaceuticals.
